

# Data sheet

## I-60-D: Interior 60 minute FRR double acting doorset, single or pair

Our most popular 60 minute FRR double acting interior fire, smoke and acoustic door set, the I-60-D is available in singles or pairs. The door leaf is a solid composite timber core faced with an integral MDF layer (S-CORE). The standard door set is supplied sealer coated on both faces or you can specify a facing and/or kickplate.

- Leaf sizes up to 2030 high x 1030 wide per leaf
- Thickness 55 mm
- Weight 35.2 kg /m<sup>2</sup>
- High Acoustic values are difficult to achieve with double acting doors as it is not possible to fit drop sill seals to the door bottoms, and meeting styles present a sound path

### FACING OPTIONS

- Paint quality factory sealed
- Timber veneer full height
- High pressure laminate full height
- Vinyl to 1000 mm
- 1 mm stainless steel kickplate to 1000 mm – both sides

### LEAF EDGE DETAILS

- NZFD Bullnose (Aluminium)

### PAIR MEETING STYLES

#### Aluminium

#### *Bullnose C/C*

## JAMB TYPES AND PROFILES

Hardwood timber, 32 mm jambs, 60 mm head standard (types 1, 2 & 3), min jamb width or 1.6 mm electrogalv steel (type 8), paint quality or powdercoat options available

**T1 – Timber**

**T2 – Timber**

**T3 – Timber**

## APPROVED HARDWARE

The minimum requirement is for a fire door to be self-closing and self-latching. With our double acting doors the closers are the pivot mechanisms, which are already fitted. Hardware must be selected from NZ Fire Doors' Approved Hardware list from the column '60 min'. Fitting any hardware that inhibits self-closing or self-latching is not approved by NZS 4520

**IMPORTANT:** Fitting untested or inappropriate hardware may affect the performance of the door and will void the warranty.
