Data sheet

I-NF-TW: Interior timber-framed windows, single or double glazed with timber frame

The I-NF-TW is NZFD's non-fire window unit in a timber frame. We can make any shape you need, however you should consider ease of transport and on-site handling (weight and size). Depending on size, pre-built multiple pane units are available ex-factory.

Your choice of glass affects available pane sizing. Due to the highly bespoke nature of this unit, please contact a member of our sales team to discuss and confirm specific pane sizing, shape design and pricing details.

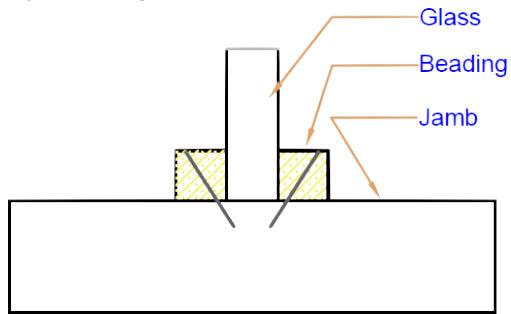

I-NF-TW: Interior timber-framed windows, single or double glazed with timber frame

- Some limits to height, no limits to shape, please see notes above.
- 32 mm timbers throughout.
- No limit to overall width, multiple units joined.
- Recommended optional mid rail – consider the manifestation needs for safety purposes.
